

Learning Letters - Why a new journal?

The pace of progress in learning sciences, learning analytics, educational data mining, and artificial intelligence (AI) in education is advancing rapidly. Hence, we are launching this new journal, *Learning Letters*, to accelerate the speed at which current educational research is disseminated. The traditional publication process often takes 12 to 18 months from article submission through to final publication. This new journal, *Learning Letters*, will instead offer a rapid approach to publishing research findings, reducing the time to publication and placing a stronger emphasis on communicating recent research findings.

Learning Letters is a peer-reviewed journal featuring innovative discoveries and advanced conceptual papers at the intersection of technology, learning sciences, design, psychology, computer science, and AI. Unlike most academic journals, *Learning Letters* will have a quick peer review and publication cycle of short and concise papers which will allow for very recent findings on emerging topics to be shared quickly.

Additionally, each article published in *Learning Letters* can be supported with a short online module in LIFT Learning, an Open EdX platform hosted by the Centre For Change and Complexity in Learning (C3L) at UniSA. Through LIFT Learning, authors are invited to share more details about their studies, present short videos with co-authors on findings, and engage in online discussions with the community. We anticipate that this will result in broader dissemination of research and stimulate interaction between authors and readers. As *Learning Letters* builds momentum, complemented by engagement in LIFT Learning, we hope that our research, academic, and professional community will be able to contribute to the sharing of knowledge and discovery around contemporary issues facing education today and in the foreseeable future.

What types of articles?

Our primary goal is the rapid dissemination of important and emerging research in learning analytics, psychology, AI, and related learning sciences fields. We favour empirical and research-based articles that are supported by high quality data and provide insight and advances in learning domains.

We also publish conceptual pieces that reflect urgent needs in the academic domains that are our primary focus of interest. These conceptual pieces will provide insights from experts regarding important developments in the digital transformation of education, as well as synthesis of the impact of this transformation on society and learning institutions.

Editorial Team

Editors-in-Chief

George Siemens

Centre for Change and Complexity in Learning, University of South Australia, Australia

Maarten de Laat

Centre for Change and Complexity in Learning, University of South Australia, Australia

Florence Gabriel

Centre for Change and Complexity in Learning, University of South Australia, Australia

LEARNING LETTERS: WHY A NEW JOURNAL?

Negin Mirriahi

Centre for Change and Complexity in Learning, University of South Australia, Australia

Technical Editor

John Kennedy

Centre for Change and Complexity in Learning, University of South Australia, Australia

Assistant Editors

Alrike Claassen

Centre for Change and Complexity in Learning, University of South Australia, Australia

Anne Morrison

University of South Australia, Australia

Editorial Board Members

Ryan Baker

Penn Centre for Learning Analytics, University of Pennsylvania, United States

Aneesha Bakharia

Institute for Teaching and Learning Innovation, University of Queensland, Australia

Lucila Carvalho

Institute of Education, Massey University, New Zealand

Sao Ee Goh

National Institute of Education, Singapore

Caroline Haythornthwaite

Syracuse University, New York, United States

Isabel Hilliger Carrasco

School of Engineering, Pontificia Universidad Católica de Chile, Chile

Yi-Fang Hsu

Department of Educational Psychology and Counseling, National Taiwan Normal University, Taiwan

Xiangen Hu

Department of Psychology, University of Memphis, United States

Jimmy Jaldemark

Department of Education, Mid Sweden University, Sweden

Tanya Marie Joosten

National Research Centre for Distance Education and Technological Advancements, University of Wisconsin-Milwaukee, United States

Judy Kay

School of Computer Science, University of Sydney, Australia

Lin Lipsmeyer

Department of Teaching and Learning, Southern Methodist University, United States

Caitlin Mills

Education Psychology, University of Minnesota, United States

Inge Molenaar

National Education Lab AI, Radboud University, The Netherlands

LEARNING LETTERS: WHY A NEW JOURNAL?

Oleksandra Poquet
TUM School of Social Sciences and Technology

Thomas Ryberg
Institute for Advanced Study in PBL, University of Aalborg, Denmark

Marcus Specht
Centre for Education and Learning, Technical University of Delft, The Netherlands

Phil Winne
Faculty of Education, Simon Fraser University, Canada

Lift Learning

Hear more about *Learning Letters* from the Editors-in-Chief on the LIFT Learning site. In their webcast they discuss the needs for a new research journal in order to keep pace with developments in educational technology in education. Their webcast is available at <https://lift.c3l.ai/courses/course-v1:LEARNINGLETTERS+0100+2023/about>
